

# RFI – Oslo-Stockholm

Welcome to a stakeholder meeting on how to build, finance and utilize a new infrastructure between Stockholm and Oslo.

The need for investments in new infrastructure is high in Sweden. It is becoming increasingly apparent that our traditional way of building and allocating funds nationally is insufficient. Investigations and public discussions clearly show that we need to find new ways to fund and implement important infrastructure projects. We believe that Oslo-Stockholm has unique good possibilities through a combination of large population and extensive travel while the need for new infrastructure is relatively smaller. Therefore, we want to find stakeholders who believe they can contribute in that work.

**Time:** May 10, 9 until 12 am

**Place:** Kollektivtrafikens hus, Södra paviljongen, Centralplan 3, Stockholm

**Program:**

- 9.00 am Welcome and presentation
- 9.15 am Presentation of the project Oslo-Sthlm 2.55,  
*Jonas Karlsson, CEO*
- 9.45 am Presentation of the cost-benefit-analysis,  
*Martin Sandberg, Trip AB*
- 10.15 am Pause
- 10.30 am Presentation of the RFI-process,  
*Åsa Hansson, PA Consulting*
- 11.00 am Questions and discussion
- 12.00 am End

Please let us know if you will attend: [rfi@oslo-sthlm.se](mailto:rfi@oslo-sthlm.se)

*Jonas Karlsson, CEO, Oslo-Stockholm 2.55 AB*

---

*Oslo-Stockholm 2.55 is owned by regions and major cities between Stockholm and Oslo. Our goal is to get better rail and train connections between the capitals and through Sweden's most populous area. With a travel time of three hours, a large part of almost 1.4 million flights each year could take the train and create stronger growth in cities along the entire line.*
